Quick gameplay instructions

> You can reconfigure all bindings by going to Settings -> Controls tab.

Move

- WSAD: move around
- Left control - move quietly.
- Shift - sprint, it drains stamina.
- Space - dash, it drains quite a lot of stamina.

Fight

- LMB

  - shoot with the selected firearm
  - wide swing for a melee weapon

- RMB - Use the item in your left hand or the secondary function of the right hand item (if your left hand is unoccupied)
- Wheel Down - quickly throw a melee weapon (even doing another action)
- Wheel Up - quickly throw two knives (or other melee weapons you happen to have).
- Middle mouse button - quickly throw a Force grenade.
- Mouse4 - quickly throw a Flashbang.
- Mouse5 - quickly throw a PED grenade (destroys Personal Electricity).

Equipment

- B - open the shop. Usually, the shop is off during warmup.
- G - drop the most recently wielded item.
- H - hide the most recently wielded item. Can fail if you have no space in your inventory!
- Q - quickly switch to the most recently drawn weapon - or any other at your disposal.
- 0, 1, 2, 3, 4, 5... 9 - choose weapons from the hotbar.

Bombs

- LMB - place the bomb
- E - Pick up items/defuse the bomb. Remember, you can't move but can shoot keeping the trigger in the bomb's range.
- C - pull out the bomb (as a terrorist)

Others

- TAB - match statistics, e.g. the players and their scores.
- F8 - administration panel for your server (only if you host this one).
- Tilde (~) - release the mouse cursor to let you interact with GUI.
